

ADP Time & Labor Management

Hardware Installation Services

A professional, cost-effective installation for your ADP Time & Labor Management solution

BUSINESS AREA

Time & Labor
Management

SERVICES

Site Readiness
Hardware
Installation
Cabling Installation

Now you can focus on your business and leave the timeclock installation to ADP. We can help you make sure your timeclocks are up and running without disruption to your daily business. A quality installation by an experienced ADP engineer means the return on your investment comes faster – better control of employee time and a more accurate payroll, keeping your employees productive and saving you money.

We provide a single-source solution aimed at satisfying all your Time & Labor Management needs.

Hardware Installation Services include:

- **Installation Coordination**
 - Comprehensive planning and coordination to help ensure a smooth, high-quality installation
- **Site Infrastructure Needs Analysis**
 - On-site analysis to determine site readiness
 - An ADP Field Service engineer will appraise your site to validate:
 - Infrastructure readiness requirements (cabling and electrical power)
 - Technical readiness requirements (LAN and PCs/Servers meet minimum specifications)
 - If necessary, we will recommend a readiness plan and provide a Cabling Plus Services quote to help you meet the requirements
- **Onsite Clock and Peripheral Installation**
 - Professional installation of all timeclock hardware components by an experienced ADP Field Service engineer
 - Installation includes mounting the physical hardware, testing connectivity and providing client admin with an overview of the clock.
- **Cabling Plus Services, if necessary**
 - Cable installation (Serial and Ethernet)
 - All tools and materials needed to complete the Cabling Service will be outlined in your Cabling Plus Services quote.
