

Home cleaning service gets payroll and so much more with ADP®

New City Cleaning prides itself on hard work, punctuality, and expert service.

Business challenges

- QuickBooks worked for bookkeeping and payroll, but did not have other benefits integrations
- Easy access to customer service is a must for a busy business owner

New City Cleaning switched from QuickBooks to RUN Powered by ADP® for fast and reliable payroll, workers' compensation, insurance, and retirement benefits in one easy package.

ADP delivers payroll and so much more

Any small business owner knows running a business is complicated. That's why many successful business managers choose business tools that simplify processes and make their lives easier.

So when Jaston Epp, owner of New City Cleaning Services, was considering a switch in payroll from QuickBooks to another payroll provider, simplicity was a major selling point.

"I was looking for great payroll but also to add other services like workers' compensation quotes, business insurance, retirement accounts, and other features all through one solution," says Epp. "QuickBooks was fine with payroll but didn't have the ability to add benefits easily. That was a big reason I chose ADP — they just offered more."

Always Designing
for People®

He continues, "RUN is so easy to use and the payroll is reliable — two strong selling points. RUN has all the benefits of every other HR and payroll software on the market at a competitive price. But it also has in-house offerings that are directly tied to payroll in an easy-to-use way (retirement benefits and workers' compensation being the main two) and the customer service has been excellent — ADP has human representatives that you can talk to on a regular basis when you need help."

New City gets more with RUN Powered by ADP — even adding ZipRecruiter to their suite of services, which has made the hiring and onboarding process simple and streamlined.

He concludes, "RUN works for my business. It allows me to stay compliant with retirement and workers' comp without me having to think about it at all. And my employees can access their paystubs online with their own accounts, reducing my logistics overhead."
